

MACLEOD LAND MARK RAZED  
—BRISK MOVEMENT IN REAL ESTATE REPORTED IN THE JUBILEE CITY

The ancient landmarks of the town of Macleod are gradually disappearing. Today workmen are busy pulling down an old store which reported to have been built 44 years ago. All these years it has stood on the southwest corner of twenty-fourth street and second avenue, and it is said that it was first occupied by J. D. Higginbottom and Mr. Draper. It was afterwards occupied by the P. Burns Company, and later was acquired by that company whose intention was to build a fine business block on the corner, but for some reason never went ahead with the building. Early this year they sold the property to George Sheffield, who owns the Queens Service station on the corner of 23rd street, and Mr. Sheffield is building a fine new up-to-date service station on his new location. The building will be of brick, and will have all the improvements that are to be found in all the latest styles of service stations.

The P. Burns Co. have not occupied that store for many years, having leased a more commodious building in one of the new blocks further down the street.

Property is certainly moving in Macleod at the present time, especially house property, quite a number of deals have taken place within the past few weeks. The action of the town council in bearing fruit through the energetic efforts of the Works and Property Committee, in offering free lots in the centre of the town, and in some cases also offering free some houses on the outskirts, belonging to the town, that have been standing empty for years, on condition that they are moved and made modern. All of these houses have been non-revenue-producing for years and were going to wreck, but as soon as they are moved they become revenue producing.

## CLASSIFIED ADVERTISING

**LIFE INSURANCE MEN READ THIS**—A leading Canadian Life Insurance Company requires the services of an able, energetic life insurance man to take over the territory of Macleod and The Crows Nest Line. We want a straight-thinking, clean-living, hard-hitting man, who is thoroughly familiar with the selling of life insurance, and who feels he is capable of organization work as well. For such a man this is a real opportunity. If you feel that you have the necessary qualifications for this position don't fail to get in touch with us, as we have a proposition to submit to you which is most liberal. All correspondence strictly confidential. Write to Box No. 407, The Macleod Times.

**FIT FOR SALE—THRESHING OUT FIT**—30-60 Runley engine, 32 new steel separator with garden city feeder; will sell cook car and bunk car and some wagons and racks if desired. Will sell at sacrifice as owner is not able to run or look after. Also 28 ton Massey-Harris D. D. drill, used about 10 days. Power lift and truck for horses or tractor. Phone 11 or write G. R. Torrence, Granum.

## OPTIMISTIC OUTLOOK FOR AGRICULTURE

Winnipeg, April 30th. Optimism prevailing throughout the West among farmers is justified by the Agricultural situation generally according to a general summary of conditions throughout the prairie provinces, issued from the office of the Agricultural Department of the Canadian Pacific Railway here today, while winter started early, November and December being unusually cold, no lengthy period of extreme cold experienced after New Year. Mild March gave promise of early spring opening. Conditions did not last as April was cold for most part with ground frozen. Fall rains and average amount of snow during winter have promised plenty of moisture everywhere, and in addition most sections have had since April 1st either rain or snow, so that rapid germination and growth should take place with warm weather. Farmers report for start several weeks ago held up on account of cold weather.

Seeding now general on higher and lighter soil, and with favorable weather conditions should be general by middle of week. On account late seeding last spring more than usual acreage summer-fallow in embryo, and there is likelihood of greater acreage in wheat this season, and greater percentage of it seeded on summer-fallow. Total acreage prairie provinces fall plowing, summerfallow, and new breaking substantially exceeds last year. Estimated 16,374,570 acres against 15,474,592 acres last year. Plenty of seed and quality not as good as last year. Livestock wintered well with sufficient supply rough feed. But short on grain feed in some districts particularly in Manitoba. Reports on fall wheat and Rye indicate both crops came through winter well, showing signs of good growth.

Seeding soil work commenced generally by middle of week in Manitoba and higher and lighter land, and next two days should see it general over province, except those portions flooded by overflow of Assiniboine River. Doubtful whether or not inundated areas will be sufficiently dried out in time for wheat seeding, unusually fine weather generally. March gave farmers good chance to prepare, as soon as soil and weather permitted, time was lost in getting to work and rapid headway now being made. All parts of the province has ample moisture and in this respect situation as favorable as could be wished for. Plenty seed grain, shortage seed oats which existed due to rust last year affecting this crop as seed had been taken care of by importation of good seed from Saskatchewan and Alberta. Has been considerable demand for barley seed indicating there will be larger acreage than last season of this crop. Present prospects are that best acreage will exceed that of last season. Livestock wintered well but seem to show effects shortage seed grain in some districts. Steady demand for farm help which has been satisfactorily met.

In Saskatchewan spring opened favorably but somewhat slowly. Province well supplied with seed of good quality with no shortage except oats. Good oats, but some seed was scarce in some districts but requirements taken care of by surplus from other sections. All parts of province have good moisture supply as in other years. Feed is general so that spring work will not suffer on this account. Wheat seeding has commenced on considerable scale and should be general by middle of week if weather holds. Steady demand for farm help throughout province has been fairly well met. Cattle on whole look well.

Very early start was hindered by unsettled weather during most part of April. In Alberta little indication of seeding being completed before average time. No lack of moisture and farmers are optimistic in this regard with result that fall acreage intended for wheat and other crops will be put in. In southern Alberta considerable threshing has been held over from last year, and expected to get remainder finished in time for another crop this year. Tests of this grain for seed have been satisfactory. Livestock wintered well as result of no bad storms. Much new breaking is looked for, due to many new tractors being purchased. Farm help is none plentiful due to fact that demand is heavy in districts where grain is yet unthreshed.

Horticultural and weather conditions in British Columbia are reported very satisfactory. Plenty of snow in interior with heavy fall rains have provided plenty of moisture. Trees matured well in fall with little winter injury being reported. Conditions indicate a heavier apple crop than last year. Orchardists have in the main improved their methods of pruning, fertilization, cultivating and spraying, and more attention has been paid by farmers to work on the land. In Vernon districts discoloration of trees indicate some injury to trees, but damage not general, and not as serious as experienced last year.

**ST. ANDREW'S PRESBYTERIAN CHURCH**  
Sunday, May 6th:  
The regular services will be held on Sunday with the pastor in charge. Sunday School and Bible Class at close of morning service.

Ladies' Aid, Monday at 3 p. m.  
C. G. I. T. Tuesday at 8 p. m. in the Parish Hall.  
Prayer meeting Wednesday at 8 p. m.  
Chair practice, Friday 7 and 8 p. m.  
Rev. A. C. Wishart, Minister.

## CAPITAL GOSSIP AND PROVINCIAL NEWS

**Health Clinic to Travel in North**  
The program of the travelling clinic which is to spend a month or more in the northern part of the province during the coming spring will open at High Prairie on May 8, it is announced by Hon. George Hoadley, Minister of Health. The clinic will be in charge of Dr. R. T. Waddell who will be assisted by Dr. Heber Jamieson, examining physician; Dr. A. E. Haycock, Dentist, and three nurses. Such minor operations and dental work as may, after examination, be found necessary, will be performed on children, using the schools as hospital bases, and cases of more serious trouble will be reported to the local doctors for medical or surgical attention. Local physicians and dentists in centres visited are being invited to co-operate in the work of the clinic.

A second party will be sent out on the completion of the northern program and the remainder of the season will be spent in the central and southern sections of the province where a number of districts have asked to be included in the itinerary of the clinic.

**Dr. Torg Leaving University of Alberta**

Dr. H. M. Torg who has been president of the University of Alberta since its organization twenty years ago, has tendered his resignation to take effect at the end of the current college year, in order that he may accept the permanent chairmanship of the National Council of Scientific Research with headquarters probably at Ottawa.

The matter of the selection of a successor to Dr. Torg as head of the University will be considered at an early date by the Alberta Government in order that the new appointee may be ready to take over the post at the opening of the 1928 fall term.

**Young People To Attend Institute Of Co-operation**  
Arrangements are being made by the committee in charge of the organization of the Alberta Institute of Co-operation, which will be held during the last week in June, to bring in 125 young men and women between the ages of 17 and 21 inclusive from all parts of the province to attend a special free course of instruction.

The young people to be given the advantage of this free course will be selected from nominations to be made by local organizations such as Junior U. F. A. locals, Women's Institute, Girls' Clubs, C. S. E. T. and C. G. I. T. groups, Boy Scouts and similar bodies and all the expenses of those selected will be met from the money in the hands of the board of trustees of the surplus wheat board fund.

Special classes will be put on for the benefit of those young people under the supervision of Prof. R. W. Murchie of the University of Manitoba and W. M. Drummond, who is returning to Alberta from Harvard University. In order that the selection may be made at an early date, the committee is asking that applications be in the hands of the Registrar of the Institute of Co-operation, Legislative Buildings, Edmonton, not later than May 25th.

**Royalty No. 8 Well A Producer**

An addition to the number of producing oil wells in the Turner Valley field has been made by the flowing into production of Royalty No. 8 during the past week, when a well was estimated at an output of 600,000 cubic feet per day was encountered at a depth of 3,753 feet. Royalty No. 4 well, the outstanding producer of the Dominion, is yielding a steady flow of some 19,000,000 feet of gas per day with a content of over 600 barrels of 73 per cent gravity naphtha.

**Danish Consul In Northern Alberta**

H. P. Madsen of the Edmonton City Dairy has been appointed Danish Consul for northern Alberta, with headquarters at Edmonton. Increasing Danish settlement, estimated at 3,709 in 1927, is given by the Danish Government as the reason for the establishment of the consulate. While no definite arrangements have yet been made as to the territory which will be served by Mr. Madsen, it is expected that this will be from Red Deer north.

**Pool Building Many New Elevators**

Eighteen new country elevators are under construction by the Alberta Wheat Pool, at the present time, it is announced from the Pool head office in Calgary. Construction work is being carried on at Morninside, Gibbons, Ryley, Pickardville, Bruce, Duff, Airdrie, Valley, Altus, Dexterville, Buffalo, Shepard, Cheadle, New Dayton, Hesketh, Vauxhall, Ferintosh, Armada and Bowden. In addition to the new buildings being erected, elevators have been purchased by the Pool from grain companies at the following points: Ellerslie, Bremner, Fenn, Taber, Elzikhon, Duchesne, Menaik and Cochrane.

**Calgary Good Farms Competition**  
A "good farms competition" confined to farms within a twenty-mile radius of Calgary will be held this year by the Calgary Board of Trade. Crops, farm buildings, gardens, livestock and machinery will all be taken into consideration in making the award. The Board has also decided to offer a challenge cup for the farmer in any part of southern Alberta who produces the best crop of wheat. The cup similarly offered last year by the Edmonton Board of Trade was won by J. H. Brown of Lloydminster.

**Settlers' Effects Must Be Free Of Weeds**  
Attention is drawn by W. J. Stephen, provincial field crops commissioner to two amendments to the Noxious Weeds Act passed at the last session of the Legislature. These are as follows: 18a. No person shall move or cause to be moved any

settlers' effects, machinery, or any other matter or material to any point in the province until all noxious weeds adhering to or being in or upon the same, if any, have been carefully removed, and a statutory declaration to the effect that this section has been complied with has been forwarded to the Minister.

18b. No person shall ship into the province any hay or green sheaves without the consent in writing of the Field Crops Commissioner.

A number of complaints have been received from different sections of Alberta that carloads of settlers' effects shipped from outside the province have included hay and feed containing a great many weed seeds and strenuous objection is taken to this by farmers in the districts affected. The co-operation of the railway companies is being secured to facilitate the inspection by the Department of Agriculture of shipments of this nature and it is hoped that the introduction of weed seeds in this way can be checked.

## SALVATION ARMY SERVICES

## THE EMPRESS THEATRE -- CURRENT ATTRACTIONS

**FRED THOMSON HAILED AS GREAT ATHLETE: WINNER OF TORONTO—THREE TIMES WINNER OF A. A. U. MEETS AT CHICAGO**

If ever there was a full fledged candidate for the Athletic Hall of Fame, Fred Thomson, star of Paramount's "Sunset Legion" showing at the Empress Theatre Friday and Saturday, is one by no small margin. The picture is a story of a sportsman, and three times won the A. A. U. all-around championship, a feat never equalled by anyone.

Keene Fitzpatrick of Michigan once said: "If I were to make an all-star, all-time football team, I would pick Fred Thomson first and then choose the rest."

In the years 1906 to 1910, Thomson brought home trophies to his college, Occidental in Nevada, than anyone else before or since his time. In the last conference meet he participated in there, he entered six of the seven events. He dashed from the high hurdles to the high jumps, in on the last call for the shot put and made 43 feet 10 inches. He won the 220 yard hurdles, broke the Coast record, and was the only man of the coast that year to put a shot more than forty-five feet.

In 1910 he entered the field meet at Chicago, practically unknown. He entered various events, including the 100 yard dash, and won, and only learned by following the leader, then with an extra spurt breezed home the winner. Especially this was noteworthy in the heel and toe race. Thomson followed the champion, Ellery Clark, for two laps and was somewhat puzzled because he found no difficulty in keeping up with the leader, and finally suspecting some trick he knew the leader, breaking Clark's own record.

Thomson and Jim Gills, a Vancouver policeman, were the only entrants from the west, and by the time the final event, the mile run, was slated to go on, the two boys were heroes to the crowd. Thomson won the race, with Gills second. In this meet Thomson set a record for the mile run of 4:30.00. He was proclaimed champion again, and in 1913 he again won the meet. Nothing seemed to be too big for the young athlete from the west to wrestle away from veterans.

The A. A. U. meets were discontinued after 1921 after Thomson's brother twice won the coveted championship; it began to look like a family affair.

In 1910 Thomson entered Princeton to attend the Theological Seminary. As he had spent four years in athletic competition, he was ineligible for Athletic contests at the university, but he was used by coaches to help train the Princeton football team.

In 1917 Thomson enlisted in the Army, and was appointed chaplain of 143rd Field Artillery and went overseas with the Fortieth Division. At the close of the war, he participated in the Allied games held in Paris at Pershing Stadium, and broke the world's record for hand-grenade throwing record which still stands.

Thomson entered the movies in 1920, and fast established himself as the fan's popular western star. His feats with and without his exceptional horse Silver King, have won him a host of admirers, and his subsequent appearances in the Paramount productions, "Jesse James," "The Pioneer Scout," and "The Sunset Legion" stamps as the best.

**SIR H. RIDER HAGGARD'S GREATEST NOVEL COMES TO SCREEN**

"Moon of Israel," taken from the famous novel by Sir H. Rider Haggard, at the Empress Theatre on Monday and Tuesday. At its world premiere in New York its critics were amazed at the immensity of some of the sets, and questioned their authenticity. Men who have made these things their life study were consulted, together with eminent members of the Jewish church. The result was that the accuracy of the picture was commended, both in regards to architectural and religious matters.

This is easily understood when it is considered that Sir H. Rider Haggard is the author of the story, and

**FINDS PRESTON, WILSON GUILTY IN LIBEL SUIT—JURY IN ARRIVING AT VERDICT IN \$50,000 SUIT—END OF FAMOUS CASE REACHED AT 3:30 TUESDAY AFTERNOON**

Cobourg, Ont., May 1.—"On behalf of the jury I beg to submit the finding that the defendants are guilty of libel and that an award of \$50,000 be given to the plaintiff."

This was the verdict brought in by the foreman of the jury in the \$50,000 libel action instituted by Sir Arthur Currie against W. T. R. Preston and F. W. Wilson, rendered at 3:30, eastern standard time, this afternoon. The poll disclosed the jurors divided 11 to 1.

The jurors divided, for: W. P. Haeckel, D. J. Surgeon, Isaac Whitefield, W. J. Newman, Gummer, A. Beach, E. C. Ashton, G. A. Anderson, J. W. Warbrick, W. J. Duncan, H. J. South, H. A. Patterson.

Against: G. A. Mounsey.

His lordship thanked the jury and complimented them upon their patience in hearing a protracted lawsuit. He thereupon dismissed them.

**Stood By Currie**

Cobourg, Ont., May 2.—Sir Arthur Currie has the following telegram from James Price of Fort William, N. S.: "As father of George L. Price, the only Canadian reported killed on Armistice Day, I wish to convey to you, sir, my humble wish that you succeed in bringing to justice those

responsible for bringing this case before the public, because all this discussion renews the old war wounds that are better forgotten."

Judge's Charge to Jury

Delivering a charge to the jury in the \$50,000 libel suit instituted by Sir Arthur Currie against W. T. R. Preston and F. W. Wilson, publisher of the Port Hope Guide, his lordship, Mr. Justice Rose, spoke from 8:30 a. m. until 11:46 a. m. eastern standard time today and two minutes later the jury retired to consider their verdict. His lordship explained the operations of the libel act, explained what constituted defamation of character and urged the jury to consider only the things that were relevant to the case.

He reviewed the evidence adduced and instructed the jury on the matters to which they should direct their consideration.

His lordship continued: "My duty is to tell you what the law is that you have to apply. Your duty as regards the law is to take it from me. I may err in my statement of law; if I do I can be set right by the court of appeal at the instance of the person prejudiced by my error."

"Then I have another duty. I am bound to decide what facts may be proved and how they may be proved. These are matters of law. I am required when an objection is taken to any bit of evidence on the ground that it is not relevant, to look at the issue and attempt to see if it is relevant. If it is not, then I am bound to exclude it, but if evidence is relevant I am bound to pass upon the proposed mode of proof to see if it is right or not by law."

His lordship emphasized that the jury's duty was to try the issue on the evidence alone and in the words of the oath to the grand jurors, "without favor or affection."

**Claim of Fair Comment**

General Currie complained that an article written by Mr. Preston in collaboration with Mr. Wilson and published in the Port Hope Guide was libellous. The defendants set up that every material statement in the article was true in substance and in fact and also they had set out the other defense, that the facts were true in substance and in fact, but that the comment was fair comment. Defense also stated that the words did not mean and could not be construed to mean what the plaintiff had said that the article concerned him. That was what the jury must decide for themselves.

Evidence had been brought by one witness that he had thought that the article concerned the plaintiff, said his lordship.

There was a statement in the article regarding the flight of the headquarters staff from Mons and it is said that this did not concern the plaintiff because it was supposed to have happened at 11 o'clock on a rainy day, and at that hour the plaintiff was not there. In a libel, however, one did not sue for evil thoughts, but for the meaning conveyed to others. The jury were to consider what these words might mean to an ordinary reader and to do so must put themselves in the position of the ordinary reader of a newspaper. What did the ordinary reader do—examining the article line by line, or just a general impression? If just a general impression what was it? What would an ordinary reader think of the sentence that read "that the headquarters staff had fled to their lives. Would an ordinary reader look up a history to see if General Currie was or was not in Mons at that hour on armistice day, or would he read it as an imputation that it was General Currie who had fled?"

After the jury went out Mr. Regan made a number of objections to his lordship's address to the jury, claiming it was one-sided. Mr. Justice Rose said he did not see anything in Mr. Regan's complaint to justify his recalling the jury.

## UNITED CHURCH SERVICES

Rev. W. H. Irwin, Minister.  
Services on Sunday May 6th, 1928, at 11 a. m. and 7:30 p. m.

Sunday School and Bible Class at the close of the morning service.

The regular clubs and classes will meet on schedule time.

H. M. Ross, B. A., a student from Queens University, arrived this week, and will take up the work in Spring Point, beginning next Sunday, May 6th, at 11 a. m. and Olsen Creek at 2:30 p. m. These services will be held every two weeks during the summer. He will also hold service at Waterton School at 11 a. m. every other Sunday beginning May 14th, and at Allenfields School at 3 p. m.

Mr. Ross is following up the work taken last year by Mr. Cooper, who was also a Queens University man. Mr. Ross comes highly recommended, and will do good work for those among whom he labors.

## CHRIST CHURCH (ANGLICAN)

Sunday, May 6th, 1928.  
11 a. m.—Holy Communion and Sermon.  
12:15—C. G. I. T. Class.  
2:30 p. m.—Sunday School.  
7:30 p. m.—Evening Song and Sermon.  
Friday 7:30 p. m. Choir practice.  
Rev. F. Randall Powell, Rector.

COMING EVENTS  
FORESHADOWED

The fourth anniversary dance of the Scarlet and Gold Club will be held at the Hudson's Bay Hall on Friday, May 11th. Admission: Ladies \$1.00; gentlemen \$1.00. Dancing at 9 p. m., lunch served at midnight. Good music.

The regular meeting of the Canadian Legion (Macleod Branch) will be held at the club rooms on Monday, May 7th at 8:15 p. m. All members requested to attend.

## BASEBALL MEETING LARGELY ATTENDED EVERY PROMISE OF SUCCESSFUL YEAR—MACLEOD POPULACE SHOULD GET BEHIND TEAM AND SUPPORT THEM STRONGLY

Darold W. Davis was unanimously re-elected president of the Macleod baseball team for the ensuing year at the annual meeting of the association held in Macleod last evening. It was one of the largest meetings that has been held by the baseball fans for some years and shows that a real live interest is being given to the game this year. Frank Walshe holds the position of vice president, while the executive committee comprises: Claude Tweed, Willard Long, J. W. Morcash, J. Swinerton, V. R. Baker and Al. West. The Dillman while Mayor MacDonald, Judge A. M. MacDonald and Mr. W. H. Shield, M. L. A., are elected as honorary presidents.

The position of manager for the team is still in abeyance although it is hoped that Sheriff Ryder Davis will be prevailed upon to accept the position. Mr. Davis is a strong supporter of amateur baseball and also thoroughly understands the rules governing the game, and how it should be played.

Nothing definite has yet been decided in the south as to what leagues shall be formed as the annual meeting of the Alberta Amateur Baseball Association had to be postponed on account of the death of President Cheesman's father in Ontario, it is expected the adjourned meeting will take place in the very near future.

The Macleod team this year promises to be one of the best in Southern Alberta and when the Jubilee City aggregation gather together on the diamond this year they are going to be mighty hard to beat.

A special subscription committee was formed for the purpose of collecting subscriptions from the townspeople for the support of the baseball club. The initial expenses of any baseball club are always heavy, there are bat, balls, masks, protectors and extra uniforms to purchase, the diamond must be put into shape and other essentials must be met. They cannot be met without money, and if they are not paid, the players and officers, who give their services willingly, without receiving any recompense, naturally lose heart, knowing that the fans are not behind them in their endeavors to furnish worthwhile sport in Macleod. In a town within 30 miles of Macleod and of smaller population the subscription committee collected over twelve hundred dollars in two days for their club, if that town can do it surely Macleod can put the ball club on its feet and start it off right.

The subscription committee comprising F. Walshe, J. Dillingham and Al. West will call on you during the next few days, don't harden your heart as did Pharaoh of old, remember his fate, give what you can, it is for clean, honest, worthwhile amateur baseball in Macleod. With good support we have every promise of a championship team in the immortal words of Kipling's great song resound in your ears on this occasion, and "Pay, Pay Pay."

## CAPONIZING

In an endeavour to determine the practicability of caponizing both Barred Rock and Leghorn cockerels and carrying them over until the Christmas market, an experiment was carried on at the Poultry Division of the Central Experimental Farm.

In this experiment one pen of forty Barred Rocks and one of forty White Leghorns, caponized in the weeks of age were contrasted with pens of cockerels of the same age and carried under similar conditions. It was found that the value of the Leghorns as broilers (11 weeks) was 22 cents and of the Barred Rocks 49 cents. The cost of feed was roughly 15 cents per bird leaving a profit over cost of feed of 7 cents and 34 cents respectively, an amount not sufficient in the case of the Leghorn cockerels, to offset the cost of labor, depreciation, equipment, etc. The prices allowed were 15 cents and 25 cents per pound for the light and heavy breeds respectively, these being the ruling prices paid in Ontario during the past season.

On the other hand, the value of these same birds as capons at twenty-seven weeks of age was \$1.48 and \$2.73 per bird respectively. The feed cost per bird was 55 cents for Leghorns and 78 cents for Barred Rocks, leaving a profit over cost of feed of 93 cents and \$1.95 per bird respectively. The values allowed for capons were 15 cents per pound for Leghorns and 40 cents per pound for Barred Rocks, being the actual quoted prices of a large Montreal produce firm. By deducting the profit over cost of feed as broilers the total profit over feed and over the amount obtainable by selling as broilers is found to be 86 cents for the Leghorns and \$1.61 for Barred Rocks.

In view of the above figures it is for the individual poultry keeper to decide whether it would be profitable to caponize or to cater to the broiler market. It is a matter of choosing between a profit over cost of feed of 7 cents per bird as broilers, or 86 cents per bird as capons in the case of the Leghorns and between 34 cents and \$1.61 in the case of the Barred Rocks, taking into consideration the amount of land required, the labor expended, the depreciation on buildings and equipment and any other costs incidental to carrying the birds over to be marketed as capons. While it might not pay the commercial poultryman with high priced land and limited space and time, it might on the other hand be very profitable for the farmer to caponize since the birds would probably have free range and require very little attention. The

## SPRING FEVER

Along about this time of year a strange and pernicious malady fastens itself on many of our sturdiest town's people.

It is brought on by bright spring days, and its major symptom is a strong disinclination for any kind of work. In severe cases, this practically incapacitates the sufferer for usefulness on his regular job; where the ailment is less strong, it renders him reluctant to perform such household tasks as carrying out the ashes, washing the auto or taking junior for a ride in his red wagon.

There are, in addition, secondary characteristics which are very distressing. Among these is a kind of dementia, giving the patient delusions of youth and romance, and, followed, in rare cases, by acute delirium, in which the sufferer

# "Save The Babies" Is It Safe To Use Pasteurized Milk?

Save the Babies by All Means, but Give Them Nature's Products So They Can Thrive.

R. I. Alsaker, M.D., the noted health specialist, quotes the following in his book of health:—

"Pasteurized or boiled milk is partly devitalized. Yet the health departments of large cities frequently insist on pasteurizing the milk. In this way we get filthy milk containing many dead bacteria; the heating temporarily prevents further decay. Such milk is especially injurious to the young. In babies it tends to produce rickets, malnutrition and death. True filthy raw milk is injurious too, but the correction is to keep the milk clean and uncooked and thus retain the health giving vitamins and natural salt."

We have the latest up-to-date De Laval milking equipment, thereby insuring cleanliness, as it is not touched by human hands. Our milk and cream is unsurpassed—We defy competition.

## HAMMERSLEY'S DAIRY

"The Home of Pure Milk" Macleod

babble of open roads, light of love and far horizons.

Such are the ravages of spring fever. There is no known cure; all that can be done is let the malady run its course and hope for a speedy recovery.

We are all subject to it. Fortunately our national habit of industry and efficiency helps us ward off serious consequences. Suppose, some day, that every man and woman in town should suddenly succumb to spring fever and, individually, should vow, "I will do no work at all today; instead I will stroll about in the fresh air, speaking gallantly to all the interesting people I meet."

Imagination reels at the thought. Offices and factories would be empty. Stores would be torpid. In which shop girls would put their heads on the counters and doze. Elevator operators would run their ears to the top floors and nap in peace. Policemen would crawl into convenient autos for siestas. School ma'ams would write poetry on unheeded blackboards, while their pupils played ball in the yard. Macleod for just one day—it would be a good idea. We ought to have one such holiday every spring, to be celebrated spontaneously and impromptu. For spring fever, like other maladies, brings moments of abnormally clear vision, moments when we see that life is, after all, a marvelous thing, backed with infinite possibilities, moments when

we realize that we are immortal children of a fair world, made for sunshine and happy chances.

We need such experience. Ordinarily we are too much blinded by the hurry and bustle of the daily job. We need to get out in the spring sunlight, where we can realize that life, after all, was not meant to be dedicated to turning lathe and typewriter and ledgers and gasoline engines.

Spring fever is a boon, not a curse.

## THAT CAVELL FILM AGAIN

That motion picture story which depicts the execution of Nurse Edith Cavell has been barred, very sensibly, out of England.

Now a storm of protest has arisen in United States against its exhibition in that country.

To prohibit its showing anywhere would seem to be good business.

In defense of the picture, it has been said that the production is a highly artistic one and that its excellence redeems its historical unpleasantness.

Any creation that stirs up international bitterness, be it motion picture, painting, novel or statuary, is most emphatically not art.

Art is the servant of beauty. And beauty is peace. There is nothing so ugly as war, nothing so hideous as the emotions that draw men into conflict with one another.

This picture should be barred, not because it offends one class or another, but because it is, in its very nature, inartistic, and because it therefore offends good taste.

Clearing land in Canada was once an industry. Eastern Canada was a forest, and the first thing to do was to clear land to grow wheat, potatoes and hay. The forest was the enemy to be routed. Today, the people of Canada are awaking to the fact that the forest they once regarded as an enemy is Canada's second best asset, and furthermore, that it is a rapidly disappearing asset.

White pine was once the most commonly used lumber in this country, and a generation ago it was comparatively plentiful and cheap. Not so today. The original stands of white pine are nearly gone. For saw-mill timber we no depend largely on spruce and fir. Seventy per cent. of the timber in Canada of saw-mill quality stands in British Columbia! Eastern Canada, once a forest, is now buying lumber from the Pacific slope.

The accessible forests of Northern Canada today are chiefly valuable as sources of spruce pulp for paper-making. How long they will last, subjected to the present rate of exploitation plus the ravages of forest fire, has been calculated, and the resulting figure is not at all reassuring. In twenty-five years, our forest Canada wakes up soon, her forest industries, her lumber mills and paper mills and wood-making factories will be closed up. Because her forests will be gone.

Canadian Forest Week calls attention to this situation and to the obvious remedy. If we can prevent forest fires, the natural growth from year to year, forestry men say, will provide for the demands of axe and saw. The Canadian people as a whole must realize the great and increasing value of the forests of Canada which remain, and each individual must do his or her best to prevent forest fires. Carefulness and good management will save Canada's forest industries in perpetuity.

Some quick offers to cure liquor-heads by administering gold. The lack of gold is curing a lot of them.

## MACLEOD LOSES POPULAR FAMILY

During the service on Sunday evening the people of Macleod United Church took occasion to wish God-speed to Mr. and Mrs. Harry Rands, old-timers in the district, who are leaving the community, having purchased a farm at Alliance, where they expect to settle during the next week.

The sermon of the evenings was delivered by Rev. A. A. Lytle of the Canadian Bible Society, who spoke on "Girdling the World with the Bible." The address was illustrated with a splendid series of slides depicting conditions in all the leading countries of the world.

After the sermon and before announcing the closing hymn, the Rev. W. H. Irwin, minister of the church, said that it would not be fitting that the service should close without reference to the fact that they had worshipped with them tonight, possibly for the last time, a family who were held in the highest respect by everybody in the Macleod district. One who was the friend of every minister who had ever worked in Macleod, and one who exemplified in their lives in a way seldom found, the Christian life at its best. He spoke of the happy personal relations he had had with the Rands family during his stay in Macleod and would regard the friendship thus established as one of the precious results of his ministry.

Mr. and Mrs. Rands were then asked to step to the front of the church, while John T. Doney, on behalf of the congregation, read the address which follows and presented them with a case of stainless cutlery, after which the congregation joined in singing "Blest Be the Tie That Binds," and a prayer by the minister brought the service to a close.

The address: "Mr. and Mrs. Harry Rands: It is with the deepest regret that this congregation learns of your impending departure from our midst. For more than a quarter of a century you have been active in the work of our church, holding all the important offices and always a bulwark of moral and spiritual strength. We are not unmindful that many times when the church has been in difficulties, you hastened to its assistance and proved a friend in need, often with great sacrifice to yourself. There was never any doubt as to where you stood, when any question having to do with our welfare was up, and your exemplary lives have always been an inspiration, not only to us but to the whole community. There is not a branch of the church in which your departure will not leave a serious gap but we sincerely hope that in your new surroundings you will find congenial fellowship and that your prosperity may fully justify your removal from our district. Any token of our appreciation of your long service must of necessity be small, but in order that you may have something which will remind you of your friends in Macleod, we are asking you to accept of this little gift."

THE "IF" OF SPRING

(With Housecleaning Apologies to Kipling)  
If you can clean your house, when all about you  
Are in the way, and blaming it on you,  
If you can rise at six with pail and dust-mop,  
And be half-dread at night, when you get through,  
If you can scrub, and not be tired by scrubbing,  
Or, being cross and tired, keep bravely mum,  
Or, being hated by the family, Don't answer back, and yet, don't look too glum—  
If you can deal with dirt, and trash, and cobwebs,  
And treat all those imposters just the same,  
If you can hear to see the rugs you've beaten  
Tracked up with mud, and yet not fix the blame,  
If you can take each glass, and treasured token  
Down from the place where it has always lain,  
Or watch the things your mother gave you—broken,  
And stop, and glue the pieces on again,  
If you can fill each swift, vexatious minute  
With soap, and brush, and all the strength you've got—  
Your house is clean, and everything that's in it,  
And, what is more—you'll be a patriot!

(Author Unknown).

## WEDDING BELLS

McFARQUHAR—ELMSLIE

On Tuesday afternoon at the United Church, Calgary, Miss Elmslie of Vancouver, B. C. was married to George McFarquhar of Macleod, the Rev. Dr. W. A. Lewis of Calgary officiating at the ceremony. Mr. and Mrs. McFarquhar left on the evening train for their home in Macleod, where the bridegroom's friends and relatives had prepared a wedding supper and greeted the newly married couple with a real housewarming.

Mr. McFarquhar is well known in Macleod having lived here for the past thirty-five years where he has successfully carried on the business of undertaker and contractor. His many friends wish both his wife and himself many years of happiness in their new partnership.

## PHILOSOPHY

By Edgar A. Guest

Old Socrates had much to say. He loved to play with words. He'd prove in a most solemn way "That halves are more than thirds." And searching the unchanging truth He sat and talked away his youth. He talked away his middle-age. And died a poisoned wise old sage.

Though Socrates is listed now

With all our honored great,

I often sit and wonder how

That old man dressed and ate,

While he was talking spent

Who earned the money for his rent?

While proving like, unlike is not.

Who bought the soup bone for the pot?

I see the plough boy in the field,

The cart on his hind,

And think more happily they yield

Than all the brilliant smart.

This world of ours has countless needs,

The grain is grown by planting seeds.

Little is done by spinning tales,

Man builds a house by driving nails.

While wise men sit and talk and talk

The toilers everywhere

Are building roads for men to walk,

And ships to fly the air,

Though words may have a sweeter

When'er I hear the hammers pound

I know with every blow that rings

That men are busy doing things.

Columbus came again, "Women are still painted," he mused; "still almost nude; still delighting in beads; still savage after all these years."

There's no outward indication that your friend made a trip to Europe except that he says "petrol" and wants to borrow money.

Stingy men smoke cigars—not because they are cheaper, but because nobody has the nerve to ask an acquaintance for a cigar.

The sorriest members of a superior race are the ones who believe an inferior race.

## Pearce News

The C. P. R. extra gang of 130 have left Pearce, where they have been working for several days. They are now at Stowe.

Over 5,000 trees have been planted in Pearce this spring and thrashing is all completed in the district.

Mr. and Mrs. F. Vilelander have returned from their honeymoon and have taken up their residence at the Griffin farm.

Mr. and Mrs. P. Koole, Mrs. Monks and Mr. Alf Hardy were visitors to Lethbridge this week.

The Pearce tennis court is receiving every attention and will soon be in first class condition for playing. Several new members have been added to the club, which is assuming large proportions. By June perhaps some games could be arranged for with members of the Macleod court.

## JOINT INSTITUTION OF PURPLE LODGES

The Elks' club rooms, Lethbridge, were the scene of an interesting event Friday, April 27, at 4 p. m., when 85 members gathered to witness the institution of Lethbridge Lodge No. 32 and Champion Lodge No. 33 Order of the Royal Purple auxiliary to B.P.O.E. The club rooms were lovely with the club's colors of purple and white.

Mrs. E. L. Lane of Calgary, Supreme Provincial Deputy of the order, assisted by Mrs. P. Thompson of Macleod Lodge No. 28, conducted the institution.

## Praise Due

The officers of Macleod Lodge No. 28, under the direction of H. R. Lady Ramsbottom, exemplified the floor work and great praise is due these ladies for the able and pleasing manner in which they conducted their part of the ceremony.

Grand Lodge No. 28 also journeyed to Lethbridge to greet and welcome the new lodges. Knaptoft and Calgary lodges were also represented.

Following the lodge ceremonies the ladies retired to the banquet hall where from flower bedecked tables a sumptuous banquet was enjoyed. The officers and a goodly number of members of B.P.O.E. No. 37 here joined the ladies. Exalted Ruler G. Parsons acted as toastmaster. Concluding the toast list presentations were made to Provincial Deputy Lady Lane and Lady Thompson by the exalted ruler on behalf of the new lodges.

The banquet over, all repaired to the lodge room where the remainder of the evening was happily spent in dancing to the strains of music provided by an excellent orchestra.

## STAND-OFF WOMEN'S INSTITUTE IN SESSION

The Stand-Off Women's Institute held the regular monthly meeting at the home of the president, Mrs. A. E. Skelding, Mrs. Jack McNeil, vice-president, took charge of the meeting for the business section of the proceedings.

There was a large number of members present, and two new candidates for membership were enrolled. The meeting was turned over to Mrs. W. B. Hovis who was convener for the day, and responsible for the program. She had arranged for a varied program, consisting of a piano selection by Mrs. Walter Loyt; a reading by Miss Eda Johnson; a reading by Mrs. Frank Williams; current events by Mrs. Wm. Perrin; and an interesting paper on Home Economics by the convener, Mrs. W. B. Hovis.

At the close of the program delightful refreshments were served by the hostess, who was assisted by Mrs. Walter Loyt, Mrs. E. Murphy and Miss Eda Johnson. All left for their homes with happy hearts, feeling that they had had a most enjoyable and profitable afternoon.

A New Orleans judge says a liquor smell coming from a house is not evidence. But it is to a man in search of a drink.

A specialist says five persons in ten are mentally unbalanced. But, alas! no two of the ten will pick the same set of five.

## WHEAT POOL NEWS BULLETIN

A meeting of the delegates of the Alberta Wheat Pool will be held on Tuesday, May 29th, in Calgary for the purpose of considering Coarse Grains Pool for Alberta, policy of the Pool elevator system for the coming season, the re-sign campaign, and any other matters of general interest to the Pool.

Over 600 men are now working on the new terminal elevator being erected by the Alberta Wheat Pool at Vancouver. This elevator will be completed by September 1st.

Rapid extension of the Alberta Wheat Pool elevator system is being undertaken this year. Eighteen grain elevators are now being built and eight have been purchased. The system will be extended by the addition of at least a hundred elevators this year. Experience in operating the Wheat Pool has shown that line and terminal elevators are imperatively required in order that members may be given the greatest possible protection, that wanted grades of wheat may be readily obtainable when the demand has arisen, and that the greatest possible savings may be effected.

Some snakes squeeze their agonized victims while alive and others do it after they are converted into shoes.

A crank is a man who thinks you are against him if you aren't as unreasonable as he is.

Typical reaction to the discovery of rottenness in high places: "Ho, hum!"

It is our sincere belief that the most successful debating club in the world is one in the hand of a policeman.

## Why Firestone Tires Give You Most Miles Per Dollar

The greatest enemy to tire life is not the harsh grind of city streets or rough roads but heat which is created inside the tire by internal friction. Heat not only weakens the fabric, but also softens the rubber causing blowouts and tire failures.

The exclusive Firestone Gum-Dipping process prevents internal heat. Every fibre of every cord is insulated and impregnated with rubber, which prevents internal friction and at the same time binds the cords together by a stronger union of rubber, thus giving greater strength and flexibility to the tire.

Take advantage of the Gum-Dipping process to lower your tire costs this year. Your local Firestone Dealer not only supplies you with these better tires that cost no more, but also gives the better service that enables you to benefit from every extra mile built in at the factory.

## W. C. T. U. CONVENTION AT GRANUM

The 16th annual convention of the Calgary District W. C. T. U. was held in the United Church, Granum, on Wednesday and Thursday, April 25 and 26, and proved to be a very interesting event. The registration showed a total attendance of 46 delegates, representing practically all the towns from Calgary to Granum. The Parkland delegation included six boys and girls from the Loyal Temperance Legion, and the manner in which they presented their report and gave the rally cry of their society was most creditable and inspiring. In the Clarendon delegation were several representatives of the Y.

The first afternoon was largely taken up with routine work, including appointment of committees and reports of officers. The President, Mrs. Wm. White, of Nanton, in her annual address sounded a clear call for service, reviewing the activities of the past and the needs of the present in such a way as to awaken within her hearers a deep sense of need for more consecrated devotion to our cause.

The report of the corresponding secretary, Mrs. F. G. Grevelt, indicated a healthy growth in all lines. The district includes 14 unions with a total membership of 425. The largest among these is Calgary West End with a membership of 114, with Clarendon as a close second with 96.

Much enthusiasm was shown in the discussion of "How we meet our budget," which was led by Mrs. Armstrong, of Nanton. Aside from their membership fees, each union is responsible for a per capita allocation of \$2.50 per member for the carrying on of provincial work, and all are entering heartily into the task of meeting it. Calgary East and Granum have already met theirs in full, with many of the others very near the goal.

An interesting paper by Mrs. Mitchell, of Calgary, on "The call of youth and how we can meet it," was received and enjoyed by the convention, and in the discussion which followed, Mrs. Gordon Wright, national president, announced that a worker among young people in the person of Miss Edith Giles, of Brockville, Ont., had been secured by the Dominion, and would likely spend a month in Alberta in the autumn of this year.

A pleasing feature of the convention was the banquet served at six o'clock by the ladies of the Granum Union in Reynolds' hall, to delegates and friends of the convention. More than one hundred persons partook of the bounteous repast and enjoyed the words of greeting voiced by several of the Granum citizens. Mrs. McElroy, of Calgary, gave a fitting reply.

In the evening the church was filled to capacity to listen to Mrs. Gordon Wright, President of the National W. C. T. U., in a masterly address which sounded a stirring note of enthusiasm and encouragement as well as a clarion call for service in the great fight against the great enemy of the home—the legalized liquor traffic. Other features of the evening were the reading of the essays which had won prizes in the recent essay competition in the Granum public schools, and the presentation of prizes for same, as well as the awarding of the various banners to the unions of the district for greatest increase of membership, etc. Granum local artists provided several excellent musical numbers. A pleasing feature was the presentation by the Granum

Union of a Provincial Life Membership pin to Mrs. McDougall.

Other presentations during the convention included a Provincial Life Membership to Mrs. Stewart, of Parkland, who for several years has served as recording secretary, and a Dominion Life Membership to Mrs. McElroy, of Calgary, the retiring vice-president.

Thursday morning was taken up largely with reports of various departmental superintendents, which showed a state of healthy activity all along the line. The departments of work most emphasized are those dealing with educational work among children and young people, and a plan was presented whereby a competition is to be conducted in the Sunday Schools. The Witness Publishing Co., of Montreal, have offered to run a series of lessons in the Northern Messenger presenting Miss McCorkindale's book, "Alcohol and Life," and at the close of the series examination questions will be published.

A parliamentary drill on "Duties of Officers" was conducted by Mrs. McKinney, and a symposium on "The Why and How of Reporting," by Mrs. Salt, of Calgary. Mrs. Grevelt, of Calgary, gave a demonstration of how to use the "Daisy Chain," a device for recording members, new and old, and each union was called upon to outline the "High Spots" in their work for the year.

The visit of Mrs. Gordon Wright to the District had been much appreciated, and resulted in a gain of 79 new members.

The following officers were elected for the coming year:

President: Mrs. Wm. White, Nanton.

Vice-President: Mrs. F. G. Grevelt, Calgary.

Corresponding Secretary: Mrs. F. Stewart, Parkland.

Recording Secretary: Mrs. R. McElroy, Calgary.

Treasurer: Mrs. C. A. Coutts, Clarendon.

Y. Secretary: Mrs. W. Salt, Calgary.

T. L. Secretary: Mrs. W. Buchanan, High River.

## FISH AND GAME PROTECTIVE CLUB ORGANIZED IN MACLEOD

A new organization was formed in Macleod on Friday evening, when a large number of enthusiastic sportsmen met to consider the matter of forming a club to assist in the protection of fish and game and the restocking of the rivers with fish and the fields with game.

His Honor Judge A. M. MacDonald was the mover of the resolution. That a game association be formed to be known as the "Macleod and District Game and Fish Protective League." Included in the motion was the objects of the League. Some of the objects are: To act as a voluntary auxiliary force to aid the constituted authorities in the protection and preservation of all fish and game in this Province. The organized observation of the habits, propagation and seasons of all fish and game and game birds, and the introduction of such new species as may be deemed advisable. To assist the authorities in the destruction of magpies, crows and other natural enemies of the song, insectivorous and game birds. To investigate the solution of streams, and to see that passage ways suitable for free passage of fish over dams, weirs, etc., in streams and rivers. To foster among sportsmen and others making use of rural roadways, care in closing of gates and particular attention to camp fire being carefully placed and properly extinguished.

The meeting then elected the following officers: Arthur Young, president; Judge A. M. MacDonald, Vice Pres.; John L. Fawcett, Secretary-Treasurer; G. H. Lang and James Baird together with officers to form the executive committee, with power to add to the number one member for each school district. Membership fee fixed at \$1.00.

The president reported that already 17 Ring Necked Pheasants had been secured and were at present with the Hutterite Colony near Stand-Off, four cocks and thirteen hens. The method of obtaining more and the costs was also given to the meeting and discussed. It was thought advisable and so decided that it would be well to accept all donations towards securing more pheasants and have same ordered through the league, thus giving this community a more prominent standing.

The question of a game preserve was discussed and some progress has been made as to getting the location East of the Blue Trail (new survey) near Stand-Off to the confluence of the Belly and Kootney rivers. This location was heartily approved and considered the best local available location under present conditions, and the president will take up the matter with the department.

The meeting was enthusiastic, all present felt that fishing and shooting are sports well worthy of a high place in the life of a community, but with it should go a respect for the laws of the land and an earnest education to all if this country is to retain its excellent sporting conditions, it can only be

done by observation of the game laws, by all pulling together to protect game and fish during the close season and being real sports always. It was mentioned that some were a little careless of the rights of the farmer, leaving gates open, shooting indiscriminately, etc., and this results against all fair and legitimate sporting. The League will endeavour among other things to have such irregularities ended as far as possible. The League is especially desirous of having at least one reliable member in each school district who will report violations and unreasonable conduct, so that the matter may be taken up by the league with the proper authorities. It is sincerely hoped that the organization may establish the most friendly feelings between all good sports whether in town or country.

## OBITUARY

## PARK B. SHELLEY

The death occurred of Park B. Shelley, at the Macleod Hospital on Sunday, April 29th, 1928. The deceased was born in his sixtieth year, a native of Spencertown, N. Y., state, but lived most of his life in Seattle, Wash. He came to Macleod and lived on his farm for a few years, situated in the Pearce district, until illness necessitated his removal into Macleod where he resided with his brother William Shelley for several months. A short time ago he suffered a paralytic stroke and was taken to the Macleod Hospital, this attack proved fatal and he died on Sunday morning last. He is survived by a son and daughter living in Detroit, Mich., and one brother William J. Shelley of Macleod. The funeral was held from Christ Church, Macleod, on Wednesday morning at ten o'clock to the Union Cemetery for interment.

## SUDDEN DEATH OF MRS. W. A. JACKSON

The death occurred on Tuesday afternoon of Mrs. W. A. Jackson of Macleod, Alberta, in her 68th year. The deceased woman who was the wife of the late W. A. Jackson, well known rancher of Macleod, had evidently passed away very suddenly while drinking a cup of tea. Joseph Horner and his son took some feed down to the Jackson farm and on entering the house Mr. Horner found Mrs. Jackson sitting in her chair dead, there was a cup of tea by her side also some bread and butter, and it was quite evident by her appearance that she had died as she was preparing to take the refreshment. The Town and Provincial police were called, also Coroner Gardiner, who, on the advice of Dr. Brayton, decided that an inquest was not necessary as the woman had died from heart failure and kidney trouble. The late Mrs. Jackson was well known in Macleod, and she used to walk into town from her farm, which is situated about two miles west of Macleod, on the river bottom. For many years she has regularly taken the water levels at the river. The deceased is survived by one daughter, Mrs. Hood, who is at present teaching at Cowley. She was notified of her mother's demise and arrived in Macleod on Tuesday night. The funeral will be held from the United Church here. Mrs. Jackson's death was quite unexpected as she had apparently been in good health. For many years she had lived alone at the farm, preferring to look after her own affairs since the death of her husband.

## UNIQUE MOTOR TOUR FROM CAPE TOWN TO LONDON

Brief messages from Capetown which a few days ago chronicled the start of a party of motorists headed for London, England, made us the first chapter in a story of twentieth century adventuring that is likely to provide thrills and drama galore before it is concluded.

It is the story of a "tour" that will wind through jungle trails, over desert wastes, across rivers unbridged except by make-shift pontoons, through mud and swamps and infested marshes. Four men are attempting to journey a trail-blazing route 10,000 miles long, from Capetown, in the Southernmost part of Africa, to Cairo and thence on a swing through Europe to London.

A good share of the trip is over uncharted lands never before traversed by a stock car, amid jungle life, where a tropical sun burns down by day, and where the wilderness echoes with the threat of savage life at night. The first leg of the run—Capetown to Cairo—is scheduled for completion in 40 days.

The transportation selected by the adventurers consists of a stock Chevrolet sedan trailed by a Chevrolet truck on which is carried equipment necessary to hew a path through wilderness tangles. Included in the equipment is a complete wireless outfit with which the men will maintain contact with the outside world, and a medical chest containing anti-venom serum and surgical and first aid supplies. Each member has been inoculated against jungle fever.

Heading the party is the famous African adventurer, Captain Lacey. Others are a wireless operator, a newspaper man, and a motion picture photographer. Selection of a Chevrolet to carry the party was logical, following a demonstration of the rugged qualities of the car conducted recently by Lacey, in which he bettered by nine hours the time of the express mail train over the 2,000 mile route between Eliza-bethville and Johannesburg, in South Africa.

The Cape-to-London run, sponsored by General Motors (South Africa) Ltd., was planned originally to end at Cairo, but interest aroused by the project became so keen that the route was extended to include visits to General Motors plants at Alexandria, Berlin, Antwerp, London and Stockholm.

The Forest wealth of Canada is going up in smoke.

## GOLFERS, LOOK! LOST BALLS ARE PASSE NOW — PATENT GRANTED FOR NOVEL METHODS OF LOCATING ELUSIVE SPHERE

Lost golf balls are soon to be a thing of the past. At last a ball has been invented that finds itself, so the inventor, Samuel J. Bens, says, and he got a patent, too.

Mr. Bens enumerates several forms in which his invention may be used by acting upon sound, sight and smell. One method is to coat the ball with a mixture of volatile chloride and a substance that will produce ammonia in paste form which will prevent reaction. When the ball falls into the grass the moisture near the ground causes a chemical reaction and a vapor of ammonium chloride arises. The vapor can be readily seen by the player.

Another method is to coat the ball with pyrotechnic composition, known as "spit devil." When the club hits the ball tiny explosions start and will continue for some time after the ball has stopped.

Another way is to immerse the ball in a solution of phosphorus and carbon bisulphide. A phosphoric glow results.

By applying various aromatic odors on the ball the search can be directed by the sense of smell.

## AFTER HARVEST CULTIVATION OF HOED-CROP GROUND FOR GRAIN

The yield of grain in Eastern Canada, and especially in the Maritime Provinces, depends to a great extent upon the time of seeding in the Spring. In other words, the earlier the ground can be prepared and the seed sown, the better are the chances for a good crop.

The cost of production is also a big factor in successful grain production and the lower this is, without sacrificing returns, the more successful is the farmer. An experiment has been under way for five years at the Nappan Experimental Farm, testing different cultivation methods of sunflower ground for oats. The five year average yield of grain on the plots plowed shallow in the spring, is 63.3 bushels. Plots which were disked in the spring, (not plowed), gave an average yield of 66.6 bushels, or 63 bushels more grain at a much lower cost. None of these plots received any autumn treatment. Plots which were plowed in the fall gave a yield of 63.5 bushels and others, ribbed in autumn, 63.8 bushels. From these data we see that the cheapest and quickest preparation of a seed bed gave considerably higher yields than did the more expensive and slower methods usually followed by the farmers in Eastern Canada.

On land that is very weedy or grassy, it is advisable to plow before the grain crop, in the fall, if possible, for this enables quicker preparation in the spring for seeding, but on fairly clean land, the practice followed at Nappan, the one recommended, is to work up a seed bed about three inches deep with the disk-harrow and get the seed into the ground just as quickly as possible after the land is ready to work.

This method is practiced on turnip, corn and potato ground, as well as on sunflower stubble and good results are being obtained.

## THE IMPORTANCE OF STORES IN SPRING

The amount of surplus honey that a colony of bees can store depends largely upon the strength of its field force at the commencement of the main honey flow. The greater the number of bees available for field work when nectar is available the greater will be the harvest. The bees that are to gather the honey crop must be reared during the spring and early summer, therefore, the object of the beekeeper during this period must be to provide

## G. McFARQUHAR

## FUNERAL DIRECTOR And EMBALMER

## Motor Hearse

Phone 218 Macleod

conditions whereby his colonies may produce the largest number of bees possible. In addition to having good queens, proper protection and sufficient room for brood production, each colony must have an abundant supply of food. It has been estimated that one comb of stores is required to produce one comb of brood and it requires approximately seventeen combs of brood to produce a force of 100,000 bees, which represent a real strong colony. It is quite apparent then that food is an important factor during the spring brood-rearing period. Early flowers supply a certain amount of nectar but this amount is altogether insufficient to maintain maximum brood production and must be supplemented with food given by the beekeeper. No colony should have less than fifteen pounds of stores available at any time during the spring. Any shortage tends to retard brood rearing and this in turn affects the crop produced. Honey or sugar syrup can be given to make up any shortage that occurs but never give honey from an unknown source for fear of disease.

If the man in the new installment sedan speaks of m.p.h., he means "miles per hour"—not "my poor house."

"The boobs are hostile to new ideas?" Is that so? Just show us an idea that's new, please.

Example of futility: A bald head covering a sheik complex.

Forest fires are burning Canada's national Forest heritage.

All Canadians pay a share of the Forest fire loss.

The fire fiend takes toll of Canada's forests.

of the Howe district, went to Edmonton on Tuesday morning, following the advice of his medical advisors regarding his disability. Mr. McLean's illness was regarded as serious by the doctors and prompt treatment was advised.

Fred Dowson of the P. Burn's Co., has been transferred from the Blairmore store to the Macleod branch. Freddy will be a welcome acquisition to the baseball team this year, especially on the rosters

bench where his stentorian tones are ever welcome, cheering on the home team.

For fully a week the weather has been almost perfect for farming operations. Yesterday and today has been rather windy, but some farmers were pleased to have the wind to help dry up the low wet spots on the land. Threshing is practically completed all round Macleod, and quite a large number have been seeding during the week. Next week will see seeding general all over the district, as a large amount of land is ready for the seed drill. It is estimated that there will be at least 20 per cent. more land seeded this year than last year, as there was a large acreage of new land broken last year.

Mr. and Mrs. T. H. Stedman returned to Macleod on Friday last after several months vacation touring in California and Mexico. Mr. Stedman stated that his wife and himself had greatly benefited from their trip both in health and strength. Business conditions in the California cities is excellent and the weather during the past few months has been ideal. Mr. Stedman attended the big race meetings at Tinian, and claims that it was really worthwhile to again witness the big fields of entries of some of the best blooded horses on the continent. One point both Mr. and Mrs. Stedman strongly emphasize is, not to go to California for a holiday unless you have lots of surplus cash to spend, as you really need it to travel around and see the sights.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION—CRIPPLED CHILDREN

There is nothing that touches the heart of humanity as much as the sight of crippled children. There is always a willingness to do what is possible to lighten the burden of their affliction and to brighten their lives. This is a commendable spirit as it gives evidence of man's regard for those who are not so fortunate as he is himself. There is also behind it the feeling that every child should have a chance in this world.

It is unfortunate that, to the majority of people, a crippled child is one who is deformed physically or who has lost part of a limb. These make up only part of the group. The child who has a damaged heart or whose organs are deficient in any way is just as much a cripple as is the child whose bones are twisted.

It is right and just that suitable and extra attention should be provided for these crippled children. Because of their handicap, they need special care and guidance in their education.

While this is true, our chief concern should be to prevent any child from becoming crippled and, as a result, handicapped in life's venture. It is a fact that the condition of many of these children could have been prevented by care and proper treatment at the right time.

Many damaged hearts result from diseased tonsils and teeth which are not properly and promptly treated. Much permanent damage results from such diseases as scarlet fever and measles.

If we wish to protect our Canadian children, then it is our responsibility to support the work of the departments and health organizations which seek to prevent the conditions that cripple children; which bring to the attention of parents the need for early and proper treatment; and which seek to spread knowledge concerning prevention.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

Logic is just a slow masculine process of arriving at truths known to females by the time they learn to talk.

Where would we be without paper—save the Forests.

Put out your matches and save the Forests.

The careless incendiary burns Canada's Forests.

The way to combat birth control is to make the stork and the wolf quit working together.

## REACH & COMPANY, Ltd.

DEPARTMENTAL STORE, DRY GOODS, CLOTHING, BOOTS AND SHOES, GREAT WEST GARMENT AND OVERALL COMPANY'S MANUFACTURES, GROCERIES, VEGETABLES AND CONFECTIONARY

Last week was a busy one in boots, shoes and hosiery. You would think that was all the fig leaf covering that a person wanted, yet the ladies will even rob the mens wardrobe, as poor Jiggs can testify. He called out and wanted to know who had taken his tie, he could not find it, his daughter called out, "Oh, mother made a dress of it." The heart broken man called out, "Oh Maggie, my darling, lend me your garters and I'll make a tie out of them."

SPRING MILLINERY

Comprising childrens fancy straw hats. Last year the children did not wear any head covering, we hope it wont occur again. For with all these abbreviations in women's garments a merchant won't get rich on the amount of goods he sells. Instead of selling goods a yard wide, the demand will be for material an inch to an inch and a half wide.

We only appeal to the men to help us out, our profits are less than ever, we have to make prices appealing to enlist their sympathy, for without trade nobody can live. Men's and Boys' Clothing at cost, Boots and Shoes at very little over cost.

Come and see us and if you only buy a little it will be appreciated.

**REACH & COMPANY, Ltd.**
